Summary

AI-enabled Full-Stack Developer skilled in Next.js, React.js, TypeScript, Node.js, and Python with experience building AI-integrated applications, scalable web platforms, and automation workflows. Strong interest in product engineering, LLM-powered systems, and modern AI development workflows.

Experience

- **AI Tools Development Intern, Vedabrata Rao Consultancy OPC Pvt. Ltd.** Mar 2026 – May 2026
 - Built AI-powered consultation and workflow automation systems using LLM integrations, prompt engineering, and automated response pipelines to improve operational efficiency and reduce manual handling time.
 - Collaborated with cross-functional teams to design and deploy scalable AI-driven solutions tailored to client requirements.
- **Team Lead (AI), SPIE – The International Society** Oct 2025 – Mar 2026
 - Led a 5-member team to develop an AI-powered Practice Test Generator capable of automated question generation, answer evaluation, difficulty balancing, and workflow management using Python and prompt-based AI systems.
- **Frontend Developer, Assemble (Remote)** Jun 2025 – Jul 2025
 - Developed reusable and responsive UI components to improve frontend consistency, accessibility, and application performance across devices.
 - Standardized frontend design patterns to accelerate feature development workflows.
- **AI and IT Intern, Ioncure Tech Pvt. Ltd.** Feb 2025 – Apr 2025
 - Improved frontend architecture for a study-abroad platform with responsive UI enhancements for better cross-device usability.
 - Integrated AI-assisted automation workflows to reduce manual operations and improve user experience.
- **Tech Lead, Book with UVA** Aug 2024 – Feb 2025
 - Led a 4-member full-stack team to deliver platform features that improved overall user satisfaction by 20%.
 - Managed development workflows and streamlined frontend-backend REST API integrations for improved feature delivery.

Education & Achievements

B.Sc. Physical Sciences with Computer Science	University of Delhi	2022 – 2025
CGPA: 8.41	GATE 2026 Qualified (CS) – Score: 359	

Projects

- **AI Consultation System — Next.js, TypeScript, Node.js, OpenAI APIs**
 - Built AI-powered consultancy workflow and response automation tools using LLM integrations, prompt engineering, and automated response pipelines.
- **AI Practice Test Generator — React.js, Python, Node.js**
 - Developed an AI-based assessment platform capable of automated question generation, answer evaluation, difficulty balancing, and workflow management.
- **TheraLink — Next.js, Node.js, MongoDB**
 - Built a full-stack mental health platform with secure authentication, responsive dashboards, and user-focused workflow management.
- **Blockchain E-Voting System — Solidity, JavaScript**
 - Developed a decentralized voting system using smart contracts and cryptographic verification mechanisms.
- **My-Shop — React.js, Node.js, MongoDB**
 - Built a responsive e-commerce application with cart management, product filtering, and backend integration.

Research & Hackathons

- **Face Recognition System (AI) — Python, OpenCV**
 - Built a real-time identity verification system using OpenCV and image-processing workflows.
- **Smart India Hackathon 2024 & 2025**
 - Developed technology-driven prototypes addressing real-world problem statements.
- **HackOdisha 5.0 – SafeTrails**
 - Built a smart tourist safety system integrating AI models, blockchain-based security, and geo-fencing.

Skills

Languages: JavaScript, TypeScript, Python, C++

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

AI & Tools: Prompt Engineering, LLM Integrations, OpenAI APIs, Conversational AI

Developer Tools: Git, GitHub, VS Code, Cursor, GitHub Copilot, Postman, Netlify

Certifications: React.js Development, Advanced JavaScript, ML Basics, Accenture Software Engineering Job Simulation, Deloitte Tech Consulting
