## Summary

AI-enabled Full Stack Developer with experience building AI-powered applications, scalable web platforms, and automation workflows using Python, React.js, Next.js, TypeScript, and Node.js.

## Experience

- **AI Tools Development Intern, Vedabrata Rao Consultancy** Mar 2026 – May 2026
  - Built AI-powered consultation and workflow automation systems using LLM integrations, prompt engineering, and automated response pipelines to improve operational efficiency and reduce manual handling time.
  - Collaborated with cross-functional teams to design and deploy scalable AI-driven solutions tailored to client requirements.
- **Team Lead (AI), SPIE – The International Society** Oct 2025 – Mar 2026
  - Led a 5-member team to develop an AI-powered Practice Test Generator capable of automated question generation, answer evaluation, difficulty balancing, and workflow management using Python and prompt-based AI systems.
  - Coordinated feature planning, testing, and deployment workflows while mentoring team members on AI development practices.
- **Frontend Developer, Assemble (Remote)** Jun 2025 – Jul 2025
  - Developed reusable and responsive UI components to improve frontend consistency, accessibility, and application performance across devices.
  - Standardized frontend design patterns to accelerate feature development workflows.
- **AI and IT Intern, Ioncure Tech Pvt. Ltd.** Feb 2025 – Apr 2025
  - Improved frontend architecture for a study-abroad platform with responsive UI enhancements for better cross-device usability.
  - Integrated AI-assisted automation workflows to reduce manual operations and improve user experience.
- **Tech Lead, Book with UVA** Aug 2024 – Feb 2025
  - Led a 4-member full-stack team to deliver platform features that improved overall user satisfaction by 20%.
  - Managed development workflows and streamlined frontend-backend REST API integrations for improved feature delivery.

## Education & Achievements

**B.Sc. Physical Sciences with Computer Science**, University of Delhi 2023 – 2027  
CGPA: 8.41 — GATE 2026 Qualified (CS) – Score: 359

## Projects

- **AI Consultation System — Next.js, TypeScript, Node.js, OpenAI APIs**
  - Built AI-powered consultancy workflow automation tools using LLM integrations, prompt engineering, and automated response pipelines, reducing manual effort and improving operational efficiency.
  - Integrated AI-driven response generation and knowledge retrieval workflows to streamline client communication processes.
- **AI Practice Test Generator — React.js, Python, Node.js**
  - Developed an AI-based assessment platform capable of automated question generation, answer evaluation, difficulty balancing, and workflow management.
- **TheraLink — Next.js, Node.js, MongoDB, OpenAI APIs**
  - Developed an AI-powered mental health platform with secure authentication, user dashboards, and a conversational chatbot for real-time support.
  - Implemented LLM integrations and prompt-engineering workflows to deliver contextual and personalized user interactions.
- **Blockchain E-Voting System — Solidity, JavaScript**
  - Developed a decentralized voting system using smart contracts and cryptographic verification mechanisms.

## Research & Hackathons

- **Face Recognition System (AI)** Python, OpenCV
- **Smart Classroom Management System** AI-Based Automation
- **Smart India Hackathon 2024 & 2025** Semi-Finalist
- **HackOdisha 5.0 – SafeTrails** AI + Blockchain

## Skills

**Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS

**Backend:** Node.js, Express.js, FastAPI, REST APIs

**Programming:** Python, JavaScript, TypeScript, C++

**Databases:** MongoDB, MySQL, PostgreSQL

**Cloud:** AWS (EC2, S3), GCP

**Developer Tools:** Git, GitHub, GitHub Actions, Vercel, Netlify, Postman, Cursor, GitHub Copilot

**AI/LLMs:** Prompt Engineering, LLM Integrations, OpenAI APIs, Conversational AI
