Summary

Frontend Developer with strong experience in React.js and Node.js, focused on building scalable, user-centric web applications. Proven ability to deliver production-ready features, optimize UI/UX, and work across full-stack systems.

Experience

- **Web Developer, SPIE – The International Society** Jan 2024 – Oct 2025
 - Built and optimized interactive React.js applications, increasing user engagement by 15%.
 - Led development of an AI-based Practice Test Generator for automated question generation and evaluation.
 - Collaborated with cross-functional teams to deliver scalable, production-ready features.
- **Frontend Developer, Assemble (Remote)** Jun – Jul 2025
 - Developed reusable UI components with a focus on performance and accessibility.
 - Improved UI consistency by standardizing component patterns across the application.
- **Tech Lead, Book with UVA** Aug 2024 – Feb 2025
 - Led a 4-member full-stack team to deliver platform features, improving user satisfaction by 20%.
 - Managed development cycles, task allocation, and frontend–backend integration.
- **AI and IT Intern, Ioncure Tech Pvt. Ltd.** Feb – Apr 2025
 - Contributed to frontend redesign and responsive UI improvements for a study-abroad platform.
 - Assisted in integrating AI-driven features and automation to enhance user workflows.

Education

B.Sc. Physical Sciences with Computer Science CGPA: 8.41	University of Delhi, India	2023 – 2027
--	----------------------------	-------------

Projects

- **TheraLink:** Full-stack mental health platform built with React and Node.js.
- **Blockchain E-Voting System:** Smart-contract based voting platform with secure authentication.
- **My-Shop:** E-commerce application with dynamic cart, filtering, and backend logic.

Research & Hackathons

- **Face Recognition System (AI):** Real-time identity verification using Python and OpenCV.
- **Smart India Hackathon 2024 & 2025:** Developed technology-driven solutions for national-level problem statements.
- **HackOdisha 5.0:** Built *SafeTrails* – Smart Tourist Safety System using AI, Blockchain, and Geo-fencing.

Skills

Languages: C++, Python, JavaScript, NLP, AI, Conversational AI,

Frameworks: React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, Netlify, Tableau

Certifications: React.js Development, DSA, ML Basics, Advanced JavaScript, Accenture Software Engineering Job Simulation (Forage, 2025), Deloitte Technology Consulting Job Simulation (Forage, 2025)
